### DETAILED ACTION

1. Receipt is acknowledged of Applicant's Preliminary Amendment, filed July 8, 2003.
2. Receipt is acknowledged of Applicant's Prior Art Statement, filed July 8, 2003, and March 8, 2004, respectively.
3. Claims 1-21 have been canceled.
4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 22-30, drawn to a chemical mechanical polishing apparatus, classified in class 451, subclass 6.
  - II. Claims 31-35, drawn to a polishing pad, classified in class 451, subclass 526.
  - III. Claims 36-37, drawn to a method of endpoint detection, classified in class 451, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

5. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method as claimed may be performed by another materially different apparatus, such as one in which a change in frequency of light is used to detect endpoint, rather than intensity of the signal.
6. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does

Art Unit: 3723

not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require solid light-transmitting windows. The subcombination has separate utility such as a pad for general use in viewing a workpiece during polishing, without the use of a processor.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (703) 308-1360. The examiner can normally be reached on 8:00-5:30.
